

# Eritreas uddannelsessystem får stor anerkendelse af UNESCO

Eritrea's increases in youth literacy have been recognized by UNESCO as being among the biggest achieved anywhere in the world over the past 50 years.

Data from UNESCO's Institute for Statistics for 2018 indicate that about 76.6 per cent of adults in the Eritrea are literate, with youth (15 – 24 years) literacy standing at about 93.3 per cent. This shows progress from the 52 per cent literacy rate of adults and 77.9 per cent of youth in 2002. These figures stand out positively within the region and across the continent.
